Connecting with Abacus Telecomm.

The age of traditional telephony is over. With DATA connections now capable of sustained throughputs, VoIP is a viable option. No more need for multiple telephone lines and expensive add on's such as hunting facilities and call divert. One single VoIP channel is all you need to facilitate multiple calls . VoIP calls are so effectively compressed nowadays that latency, jittering and broken speech is a thing of the past.

Port and keep your landline no matter where you are.

Today you can port your traditional telephone number to an IP telephone number. This allows you to keep your number no matter where you are. Now you can have one telephone number for ALL your branches without the need to pay for expensive golden numbers. One contact number for ALL your branches anywhere in the world. The cost to do this is only R185.00 ex VAT once off.

The nuts and bolts - How much does it cost?

Abacus Telecomm offers one of the most competitive rates in the market. Not only that, Abacus Telecomm traffics all their voice traffic across a "white" route. So all calls are originated and terminated locally in South Africa as opposed to traversing around the planet before terminating. Rates are as follows:

Company	SA Mobile rate	Billing Increments	% Difference	SA Landline rate	Billing Increments	% Difference
Abacus Telecomm	R 0.63	1/1		R 0.24	1/1	
Telkom	R 1.14	60/30	44.74%	R 0.50	60/1	52.00%
Voys	R 0.75	1/1	16.00%	R 0.31	1/1	22.58%
Snowball	R 0.80	1/1	21.25%	R 0.30	1/1	20.00%
Snowball	R 0.65	60/30	3.08%	R 0.27	60/30	11.11%
M-WEB	R 0.74	1/1	14.86%	R 0.31	1/1	22.58%
Bitco Communications	R 0.75	1/1	16.00%	R 0.35	1/1	31.43%
Centracom	R 0.79	1/1	20.25%	R 0.38	1/1	36.84%
Euphoria Telecomm	R 0.87	1/1	27.59%	R 0.37	1/1	35.14%
Telemasters	R 1.05	1/1	40.00%	R 0.42	1/1	42.86%

What else should you know?

VoIP is by far the most cost effective way to communicate in todays business age. It is however effected by one simple thing: BANDWIDTH. We need sufficient bandwidth to traffic your calls. For a smaller concern, your existing ADSL or internet connection should suffice. If however you are a larger concern with upwards of 7 extensions then we would strongly recommend a dedicated internet connection.

ADSL is sufficient, but we are able to traffic voice over wireless/3G/HSDPA/LTE and fiber optic. We are also able to offer DATA connections dedicated for voice from as little as R99.00 per month.

Give us a call today on **+27 (0) 21 556 6327** or email sales@abacustelecomm.co.za and make the change today and start cutting you phone bill!
